

I would be very upset if you limit XM and other delivery of information that I am paying for so that the self serving owners of broadcast radio stations can attempt to force me to listen to their limited choices of programming in between the nearly constant commercials. I understand that HT 4026 is all about congressmen Pickering and Green helping their friends in the NAB and I can only hope that the FCC will oppose this. Please don't limit my choices in order to help the NAB and their cronies. This is especially bad since it seems there is no longer even a small attempt to force the radio stations to serve the communities they are in!
